# Texas Vital Events Data and Statistics: A Collaborative Process

# **BIRTH DATA, STATISTICS, AND REPORTS**

Importance

Uses

Who

How

# **BIRTH DATA, STATISTICS, AND REPORTS**

# Birth Certificates are Important

---

1. Permanent Legal Records
2. Population Estimates and Projections
3. Many of our most important statistics
  - Typical Ones
    - Birth Rates
  - But Not Just Those
    - Preterm & Low Birth Weight Rates
    - Rates of Breech Birth
    - Smoking during Pregnancy
  - Even Hot-Button Issues
    - Early deliveries by cesarean/induction with no apparent medical reason

# Birth Certificates are Important

---

## 4. Passive Surveillance:

- Assess Magnitude
- Track Trends
- Determine Groups and Locations at Risk

## 5. Research

- Assess predictors of low birth weight delivery.
- Adverse birth outcomes by smoking status

## 6. Track Migration Patterns

## 7. Statistics that Inform Policy and Decision Making

- Tracking outcomes by Medicaid vs. private/other insurance

Importance

Uses

Who

How

# **BIRTH DATA, STATISTICS, AND REPORTS**

# Assess Trends Across Time

**Percent of Live Births by Weeks of Gestation,  
Texas, 1991-2012**

Notes: Calculated Weeks of Gestation Based on Last Normal Menses Date

Percentages are of All Live Births to Texas Residents in which the Last Normal Menses Date was Known

Data Sources: Texas Department of State Health Services, Center for Health Statistics, Birth & Death Statistical Files, Texas Residents

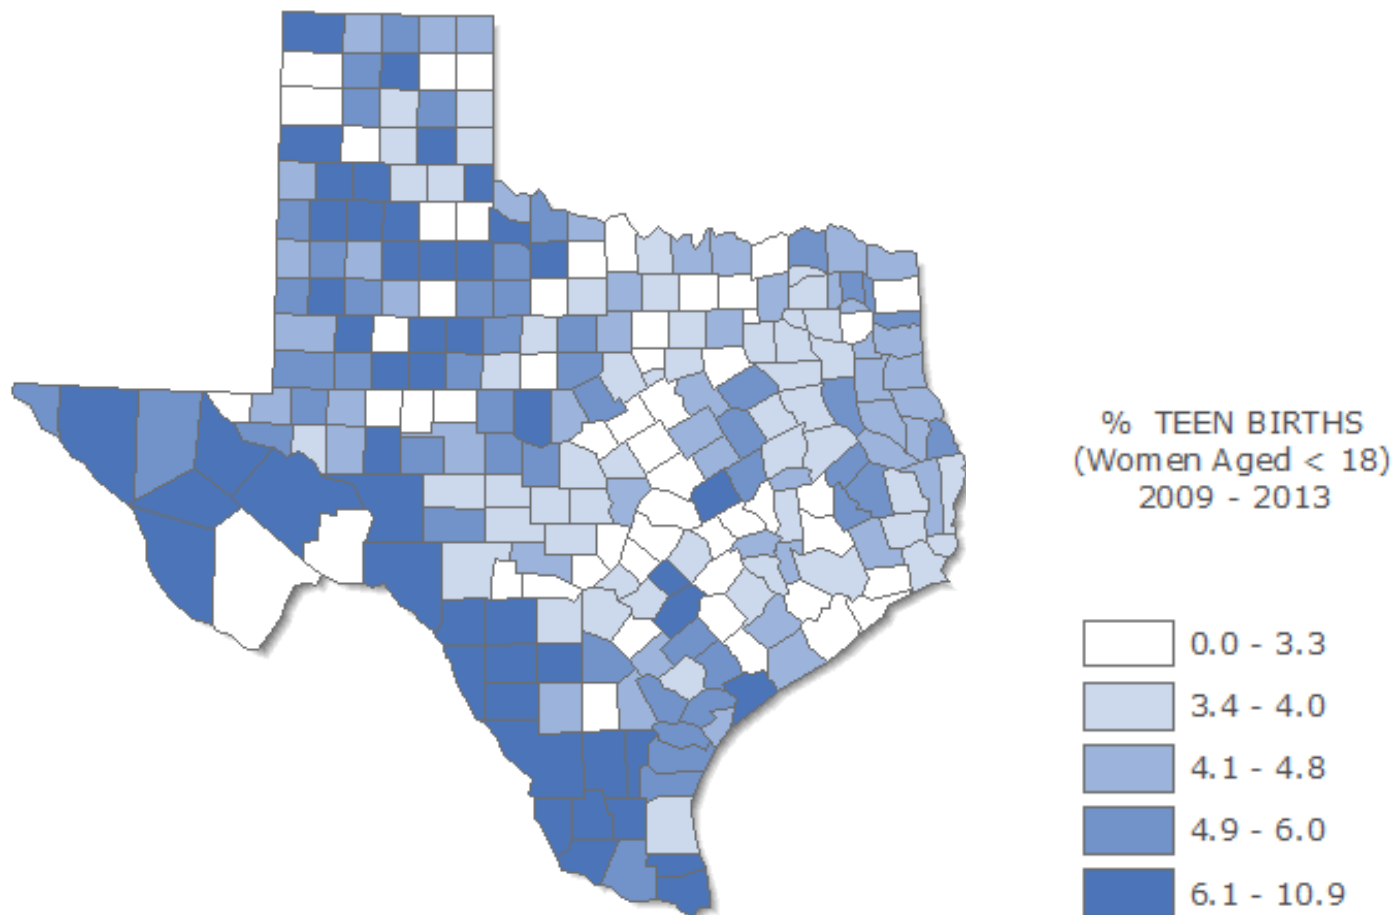

# Assess Trends Across Time

**Percent of Live Births Resulting from Fertility Treatment, Texas, 2005-2012**

# Compare Regions

Percent Live Births to Mothers Less Than 18 Years of Age  
by County of Residence, Texas, 2009-2013

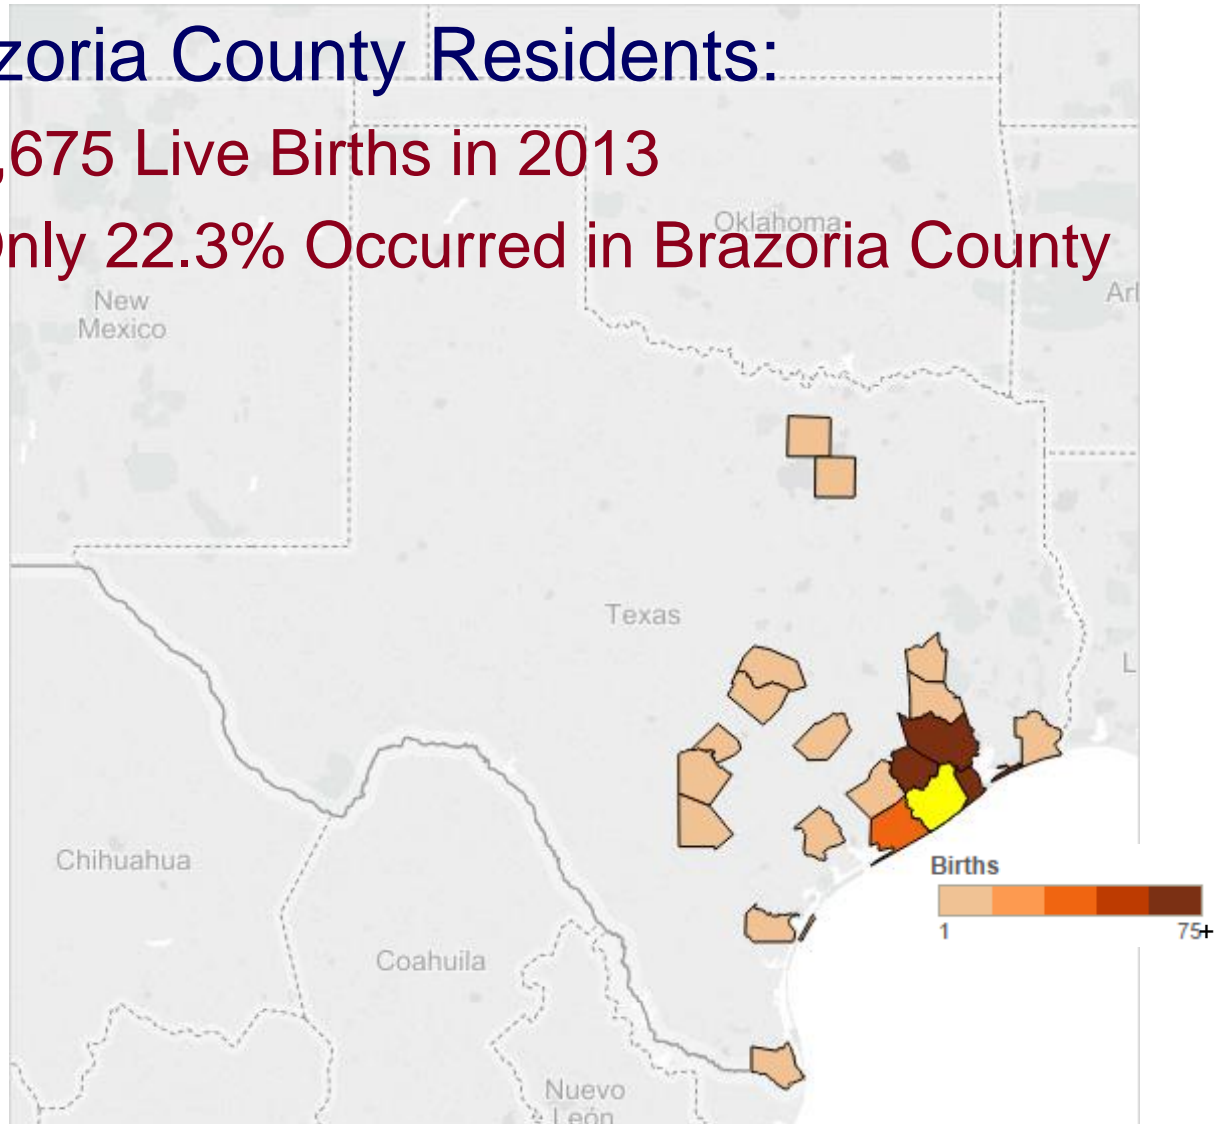

# Compare Groups

## General Fertility Rates (All Live Births / Population Women Ages 15-44) By Race/Ethnicity, Texas, 2003-2013

# Determine Migration Patterns & Shortage Areas

- Brazoria County Residents:
  - 4,675 Live Births in 2013
  - Only 22.3% Occurred in Brazoria County

# Perform Advanced Analyses

Factors Predicting Non-Medically Indicated Early Term  
Cesareans and Inductions, Texas Birth Certificate, 2012

**This one  
analysis uses  
**45%**  
of the items on  
the medical  
portion of the  
birth  
certificate!**

## Vital Statistics Annual Reports

The vital statistics annual reports include data on vital events such as births, deaths, pregnancies, fetal deaths, abortions, marriages and divorces. Tables and narratives are created for the most frequently requested topics as the data become available. To find information on a particular topic, please locate

# Migration for Birth Reports

## Reports

[Home](#) > [Center for Health Statistics Home](#) > Migration for Birth

### Migration for Birth

Data on migration for birth provide important information for health care providers. The Texas Department of State Health Statistics publishes the Migration for Birth report to provide information on the county of residence of the mothers. We report information on how many births occurred in each county. This report tabulates birth migration information for each Texas county by objectives:

- To identify areas where services are present or where Texas residents are giving birth.
- To provide specific local and regional information about potential patterns of obstetrical services throughout the state.

The information you provide on this worksheet is used to create your child's birth certificate. The birth certificate is a legal document used to prove your child's age, citizenship and parentage. Your child will use the birth certificate throughout his/her life. The State of Texas safeguards against the unauthorized release of identifying information from birth certificates to protect the confidentiality of parents and their child.

Please **PRINT** your responses carefully and accurately as errors are difficult and expensive to correct.

## The TxEVER Project

### Announcing Texas Electronic Vital Events Registrar Project

The current statewide electronic system, Texas Electronic Registrar (TER), is deployed across registration districts and licensed institutions, including hospitals, birthing centers, funeral homes, medical examiners, and justices of the peace throughout Texas. The electronic birth record component of TER was implemented in 2004, with electronic death registration added to TER in 2006 and electronic marriage applications following in 2008. While TER is a stable system, it also is aged, both in terms of technology and infrastructure. Costs to maintain the database, ensure reliability and availability, and meet the state and federal data security requirements for safeguarding protected health information have risen.

The Texas Electronic Vital Events Registrar (TxEVER) Project proposes to implement a fully integrated and comprehensive electronic vital records system, which will include electronic registration and data collection for birth, death, fetal death, marriage, and divorce.

One goal of the project is to consolidate the following stand-alone systems into

Accuracy & Standardization

# Where are we?

# What is Ethnicity?

28. **Mother of Hispanic Origin?** (Check the box that best describes whether the mother is Spanish/Hispanic/Latina. Check the "No" box if mother is not Spanish/Hispanic/Latina)

- ☐ No, not Spanish, Hispanic/Latina
- ☐ Yes, Mexican, Mexican American, Chicana
- ☐ Yes, Puerto Rican
- ☐ Yes, Cuban
- ☐ Yes, other Spanish/Hispanic/Latina

(Specify) \_\_\_\_\_

# What is the problem?

---

- Hispanic checked with Mother's Hispanic Origin:
  - 191,434 births in 2013
- Mother is Hispanic but put into the "Race:Other:Specify" field:
  - 28,539 births in 2013
- That's 7.2% of Hispanics that we are not counting.

# What About “Other”?

---

- White, Non-Hispanic, Not Multi-racial
- Black/African-American, Non-Hispanic, Not Multi-racial
- Hispanic= All listed in “Origins”
- Other, Non-Hispanic
  - = American Indian, Alaska Native, Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, Native Hawaiian, Guamanian/Chamorro, Samoan, **all “Other” races and all multi-racial choices, (also includes unknowns)**

# What's New?

---

- White, Non-Hispanic, Not Multi-racial
- Black/African-American, Non-Hispanic, Not Multi-racial
- Hispanic = All listed in “Origins”
- **Asian, Non-Hispanic, Not Multi-racial**
  - = **Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, and All “Other Asian Specify”**
- **Other, Non-Hispanic**
  - = **American Indian, Alaska Native, Native Hawaiian, Guamanian/Chamorro, Samoan, all “Other” races, multi-racial choices, and “Unknowns”**

# What is a Week?

---

- \* Date of Last Normal Menses Began
- \* Obstetric Estimate of Gestation  
(completed weeks)

# What is Missing?

---

- For the Birth Year 2013:
  - 15,735 records did not have a complete date on the “Last Normal Menses Began”:
    - 8,281 missing the day portion
    - 15 missing the month portion
    - 3,774 missing both month and day
    - 3,665 were blank
- Out of 395,781, 4.0% of births records for 2013 that occurred in Texas cannot be used to determine if a baby was born premature or not.

# What did she do?

---

- \* Calculating the weeks from the Date of Last Normal Menses Began to the date of birth, we get numbers all up and down the scale.
- \* The largest number being 616 weeks. That's 11.84 years!!
- \* The smallest was 1 week that gave birth to a 8 lbs. 16 ozs. baby.

# What is lower income?

---

- Mother's Education Level
- Mother's Marital Status
- Did mother get WIC food for herself during this pregnancy?
- Intended source of payment for this delivery

# What We Don't Know...

---

- C
- C HIP
- C HIPS
- CCHC
- CH
- CHP
- FEDERAL
- J
- M
- MA
- MCARE
- MED
- N
- NI
- P
- PEDING
- PENDING
- PRI
- QMP
- S

## What Goes with “A” & “B”

---

- If the drop down box for “Prenatal Care?” is “Unknown”,
- And “Number of Prenatal Visits” is ‘44’,
- Which variable is accurate?

# What is Caring?

---

- Prenatal Care is “Yes” and yet:
  - Date of First Visit:
    - 5.68% Unknown
  - Date of Last Visit:
    - 4.37% Unknown
  - Number of Visits:
    - 0.98% Unknown
- For a Total of 5.19% Records missing data!

# What are you saying?

---

- The NCHS-NVSS reported that five hospitals from over the 300 hospitals in Texas in 2013 that had live births, had reported:
  - 97.4% of all External Cephalic Version (that were either successful or failed) that occurred in Texas.
- But had reported only 0.05% of all Non-vertex presentations.

# What is the Story?

Fetal Presentation at Birth	Final Route and Method of Delivery			
	Vaginal/ Spontaneous	Vaginal/ Forceps	Vaginal/ Vacuum	Cesarean
Cephalic (Head First)	218,671	2,098	6,018	110,806
Breech	1,209	43	26	11,511
Other	10,622	76	444	9,492
